

Batch Email Sender is a Command Line software to send bulk emails using multiple SMTP servers. You can specify the SMTP server details, specify the email body, add email addresses to text file and **send emails** to these email addresses in bulk.

Batch Email Sender home page,

<https://veryutils.com/php-script-batch-send-emails>

Batch Email Sender is written in PHP script, after you buy it, you will get full PHP source code, you can modify it to best fit your requirements.

Batch Email Sender can be run on Windows, Mac and Linux system. You can run it directly from the command line or from the website.

Batch Email Sender has a great function to use multiple SMTP servers to send the emails, for example, if daily sending limit per user account is 500, you can register 20 email accounts, with Batch Email Sender software, you can send  $500 \times 20 = 10000$  emails per day, it's good

enough for small business, and it's also a best solution to use multiple SMTP Servers for free.

Batch Email Sender is the best **bulk email sender** software, it runs on your PC, not a subscription-based online service. You don't have to recurrently pay high prices for every email shot you send out, even if your prospect number grows you pay one time for full bulk email marketing program license.

Your activity remains private and safe, you are not giving away your valuable data to any third party (why should they know who you are, what you are communicating and who you are sending to? How are they managing your data? Are they keeping them secure?).

Batch Email Sender highlight features:

- \* Send bulk emails using multiple SMTP servers.
- \* Loop in multiple SMTP servers to avoid the limitation in the SMTP server.
- \* Support SMTP servers with SSL/TLS and authentication.
- \* Specify email content in HTML and text.
- \* Add attachments to emails.
- \* Read recipients list from an external Text file.
- \* Sending happens in the background.
- \* View progress of bulk mail sending operation.
- \* Stop the process any time.
- \* Export sending results with failure reason.
- \* Bulk e-mail system: unlimited lists, unlimited recipients and no recurring fees.
- \* New email templates. A rich set of ready to use templates to help you create professional looking emails.
- \* No additional per email costs.

Batch Email Sender is the best software for sending newsletter that provides a complete set of features that allow you to easily manage every aspect of an email marketing campaign. Creating their own graphic templates, list management, sending the newsletter and analyzing campaign statistics have never been easier to manage.

## Frequently Ask Questions

Q: Is there any procedure to use multiple SMTP servers in sending emails?

A: Make a configuration file with all smtp server and credentials. Then loop through multiple **smtp servers** and send email.

Generally some users do it often to not exceed daily limit free smtp server daily limit. Like you can use Gmail smtp setting with yahoo smtp server so that one batch of email goes with yahoo and next goes with gmail.

It is part of custom programming or back up email server setting in some of software.

Q: Is there anyone know a bulk email sending software which allows me to use multiple SMTP servers in the sending process?

A: You can use Google SMTP to send bulk emails, you can use multiple Gmail Accounts to avoid limitations in one Gmail account, **VeryUtils** Batch Email Sender software has a great function to use multiple Gmail Accounts to **send emails** automatically.
