Highlight Features

Java PDF Toolkit offers a robust set of features to cater to all your PDF needs:

Document Manipulation

- Merge PDF Documents or Collate PDF Page Scans: Combine multiple PDF files or scanned pages into a single document, streamlining your workflow.
- Split PDF Pages into a New Document: Extract pages from a PDF to create new documents, perfect for separating chapters or sections.
- Rotate PDF Documents or Pages: Adjust the orientation of your PDF pages to ensure they are displayed correctly.

Security

- Decrypt Input as Necessary (Password Required): Open and manipulate password-protected PDFs.
- Encrypt Output as Desired: Secure your PDFs with encryption to protect sensitive information.

Forms and Data Handling

- Fill PDF Forms with X/FDF Data and/or Flatten Forms: Automatically fill in PDF forms with data and flatten them to prevent further editing.
- Generate FDF Data Stencils from PDF Forms: Create FDF templates from existing PDF forms for easy data integration.

Enhancements

- Apply a Background Watermark or a Foreground Stamp: Add watermarks or stamps to your PDFs to personalize or protect your documents.
- Report PDF Metrics, Bookmarks, and Metadata: Gather detailed information about your PDF, including bookmarks and metadata.

Bookmarks and Metadata

- Add/Update PDF Bookmarks or Metadata: Organize and update bookmarks and metadata for better document management.

File Attachments

- Attach Files to PDF Pages or the PDF Document: Embed files within your PDFs for comprehensive documentation.
- Unpack PDF Attachments: Extract attached files from your PDFs.

Advanced Operations

- Burst a PDF Document into Single Pages: Split a PDF into individual pages, creating separate files for each page.
- Uncompress and Re-Compress Page Streams: Optimize your PDFs by managing compression settings.
- Repair Corrupted PDF (Where Possible): Fix damaged PDFs to recover important information.

PDF Modification

- Append: Combine PDFs by appending one document to another, generating a new PDF.
- Split: Split a PDF at specified intervals, such as every 2 or 3 pages, creating new PDFs for each section.
- Split At: Divide a PDF into two separate files at a specific page.
- Insert PDF: Insert a PDF into another at a specific page.
- Delete Pages: Remove unwanted pages from a PDF.
- Extract Pages: Extract and save specific pages from a PDF.
- Rotate PDF: Change the orientation of pages within a PDF.

Watermarking and Encryption

- PDF Watermarking: Add custom watermarks to your PDFs for branding or security purposes.
- PDF Encryption / Decryption: Secure and decrypt PDFs to protect and access your documents as needed.

Forms and Transformation

- PDF Forms Support: Work with AcroForms and Static/Dynamic XFA forms for advanced form handling.
- TIFF to PDF Transformation (available upon request): Convert TIFF images to PDF format.
- Office to PDF Transformation (available upon request): Transform office documents (e.g., Word, Excel) into PDF.

Custom Applications and Data Extraction

- Build Custom Applications with Java (available upon request): Develop tailored applications using Java.
- Data Extraction: Extract text, images, and data from PDFs (available upon request).

Compliance and Collaboration

- PDF/A Conversion & Validation: Create and validate PDF/A compliant documents for archiving.
- PDF Annotations: Utilize annotations within PDFs for enhanced collaboration (available upon request).
- Digital Signatures: Create PAdES-compliant digital signatures for secure and verifiable documents (available upon request).

Cross-Platform Compatibility

Java PDF Toolkit is designed to run seamlessly on Windows, Mac OS X, and Linux, making it a versatile solution for users across different operating systems. It eliminates the need for Adobe Acrobat or Reader, ensuring that you can perform all necessary PDF operations without additional software.
