

I need a program to intercept **print jobs** from any printer driver on my system (not a single custom one) and store the contents of the **print job** as a .pdf, .png, or most likely .bmp, do you have a software to do this job?

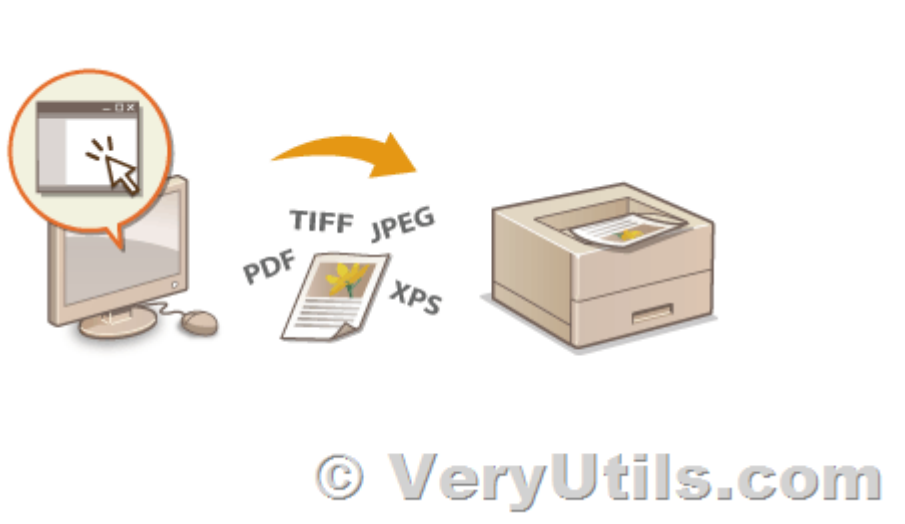

Customer

The company I work for currently uses a black box shipping system. Each morning our shipping manager prints out shipping tickets for his drivers. I would like to save a copy of each ticket printed as a PDF. The action of saving to a PDF should be done behind the scenes.

Note: The PDF copy would be in addition to the hard copy, however, I would like to generate the PDF copy when the hard copy is printed (or directly after if I can use the saved print job).

End Result: The manager prints a hard copy and a PDF gets saved to an archive folder without any interaction from the manager.

Customer

Yes, VeryPDF HookPrinter Print Logger software can do above works for you, you may download the trial version from this web page to try,

<https://veryutils.com/hookprinter-print-logger>

With **VeryPDF** HookPrinter Print Logger software, you can intercept and capture all print jobs, convert them to PDF files, and upload PDF files to Cloud Server (Cloud Database), you will be able to view more printing information online easily.

Print Tracking & Log

VeryPDF HookPrinter Print Logger software can capture all information related to printing, including number of pages, date and time submitted, username, computer name, printer name, document name, color, paper size and job size, it can also intercept and capture SPL and SHD files from all installed printers, convert them to PDF files, upload these PDF files and other information to cloud server (cloud database) automatically.

VeryPDF HookPrinter Print Logger can track following information,

- * The time of print.
- * The name of the user who printed.
