

Questions:

1. We often use PDF to record our information and then share to others. It is the king of the office software. However, compare with Microsoft office Excel, PDF is lack of the capacity of analysis. Therefore, I would like to extract data from PDF to CSV on Windows OS.
2. I have several PDF files that are the same. I need to extract the data and put it into a CSV file. Can I do this in via a batch command (command line?).
3. How can I convert PDF to CSV? I have several hundreds of PDF files number 01.pdf, 02.pdf, 03.pdf, etc. in one folder. These are vey long document with a lot of information (text, tables, figures, etc). I need to extract the information associated with one disease in particular (Varicella). The information I need to retrieve is the number of cases in each and every state and save it into a CSV file. In the output file, the first column should have the data from file 01, the second one the data from file 02, so on and so forth. Can I do this work using your PDF to Excel Converter Command Line software?

Solution:

According to above questions, these customers can use **VeryUtils** PDF to Excel/CSV Converter Command Line tool to convert PDF into CSV format document. This software will completely convert all your PDF data to CSV, even layout, so that you do not need to copy PDF data one by one. Now let us learn the below article to know how to extract data from PDF to CSV on Windows OS by using **VeryUtils** PDF to CSV Converter Command Line tool.

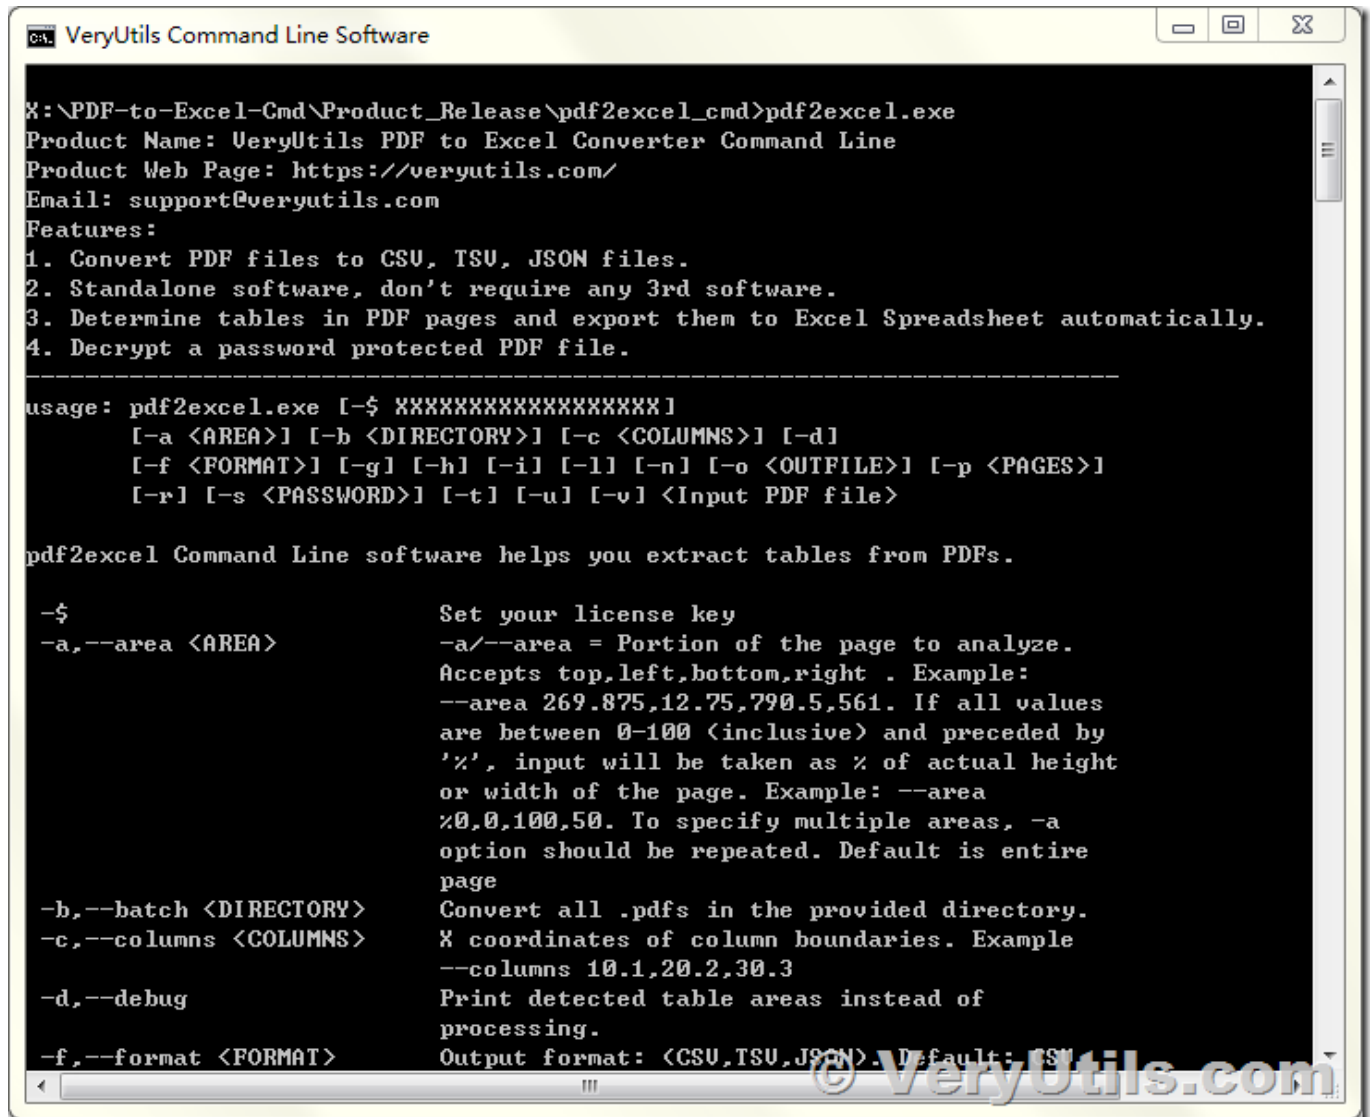

1. Please download and install "VeryUtils PDF to CSV Converter Command Line" from this web page,

<https://veryutils.com/pdf-to-excel-converter-command-line>

2. After you download and unzip pdf2excel_cmd.zip to a folder, you may run a CMD window first, if you don't know how to run a CMD window, please look at following web page,

<https://veryutils.com/blog/top-10-methods-to-run-a-command-line-window-in-windows-10/>

3. Run pdf2excel.exe in the Command Line Windows to get detailed usage information,

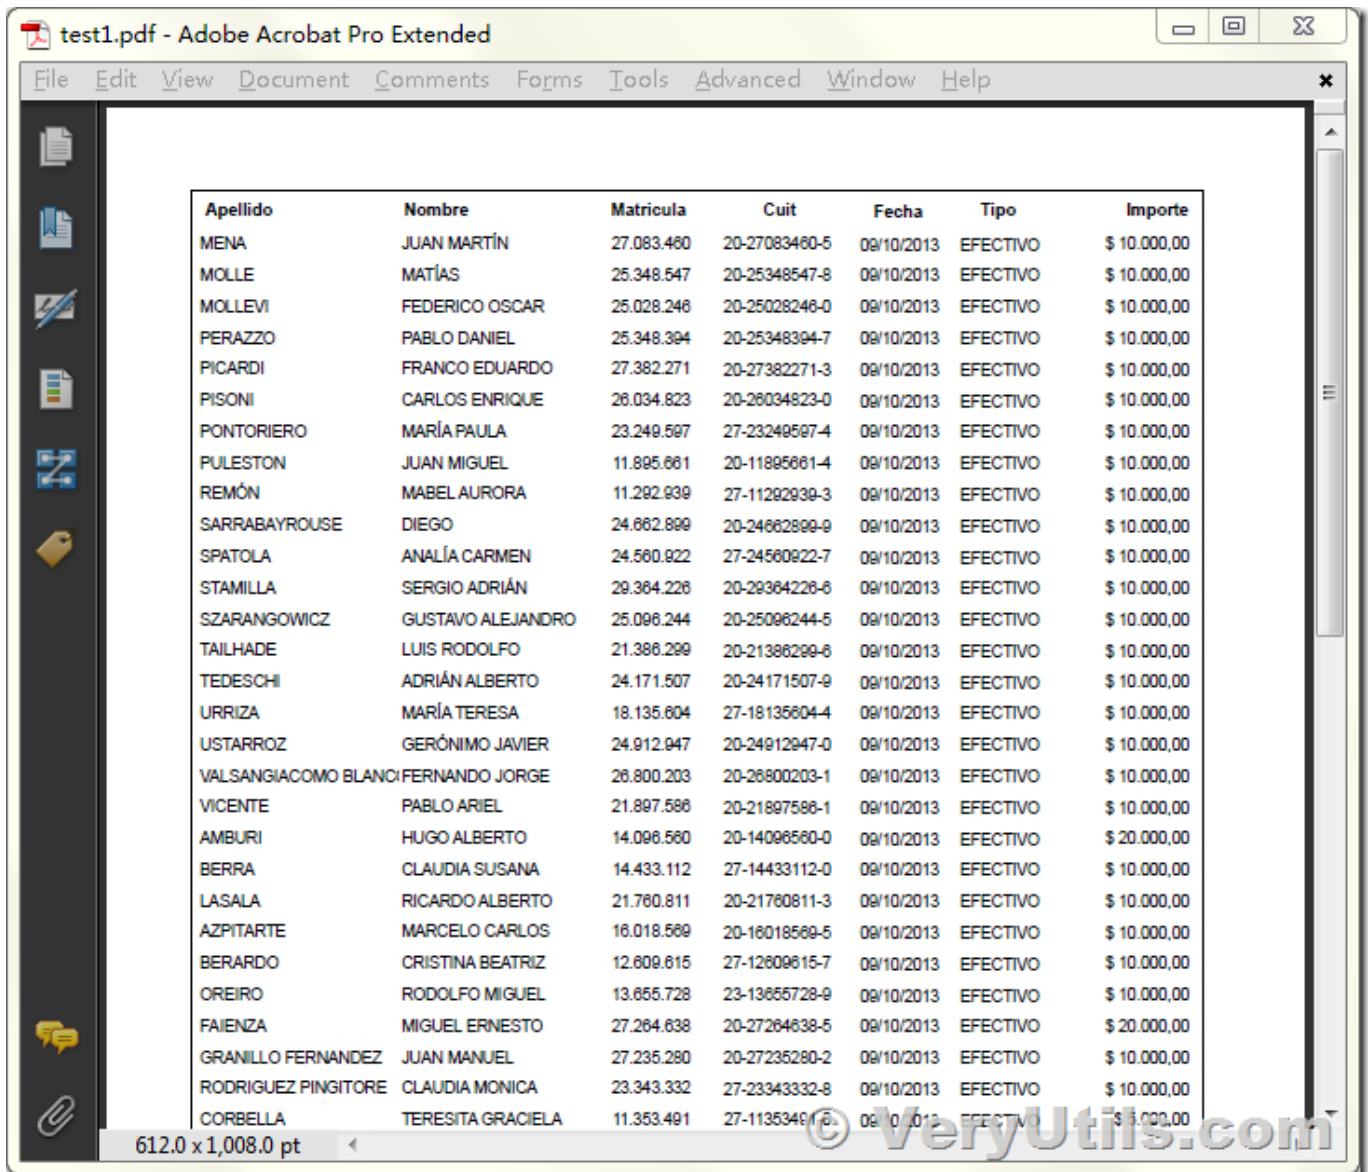

```
VeryUtils Command Line Software
X:\PDF-to-Excel-Cmd\Product_Release\pdf2excel_cmd>pdf2excel.exe
Product Name: VeryUtils PDF to Excel Converter Command Line
Product Web Page: https://veryutils.com/
Email: support@veryutils.com
Features:
1. Convert PDF files to CSV, TSU, JSON files.
2. Standalone software, don't require any 3rd software.
3. Determine tables in PDF pages and export them to Excel Spreadsheet automatically.
4. Decrypt a password protected PDF file.
-----
usage: pdf2excel.exe [-$ XXXXXXXXXXXXXXXXXXXXX]
      [-a <AREA>] [-b <DIRECTORY>] [-c <COLUMNS>] [-d]
      [-f <FORMAT>] [-g] [-h] [-i] [-l] [-n] [-o <OUTFILE>] [-p <PAGES>]
      [-r] [-s <PASSWORD>] [-t] [-u] [-v] <Input PDF file>

pdf2excel Command Line software helps you extract tables from PDFs.

-$          Set your license key
-a,--area <AREA>  -a/--area = Portion of the page to analyze.
                  Accepts top,left,bottom,right . Example:
                  --area 269.875,12.75,790.5,561. If all values
                  are between 0-100 (inclusive) and preceded by
                  '%', input will be taken as % of actual height
                  or width of the page. Example: --area
                  %0,0,100,50. To specify multiple areas, -a
                  option should be repeated. Default is entire
                  page
-b,--batch <DIRECTORY>  Convert all .pdfs in the provided directory.
-c,--columns <COLUMNS>  X coordinates of column boundaries. Example
                  --columns 10.1,20.2,30.3
-d,--debug            Print detected table areas instead of
                  processing.
-f,--format <FORMAT>  Output format: <CSV,TSU,JSON>. Default: CSV
```

4. We will try to extract the column text contents the following PDF file and convert it to a CSV file,

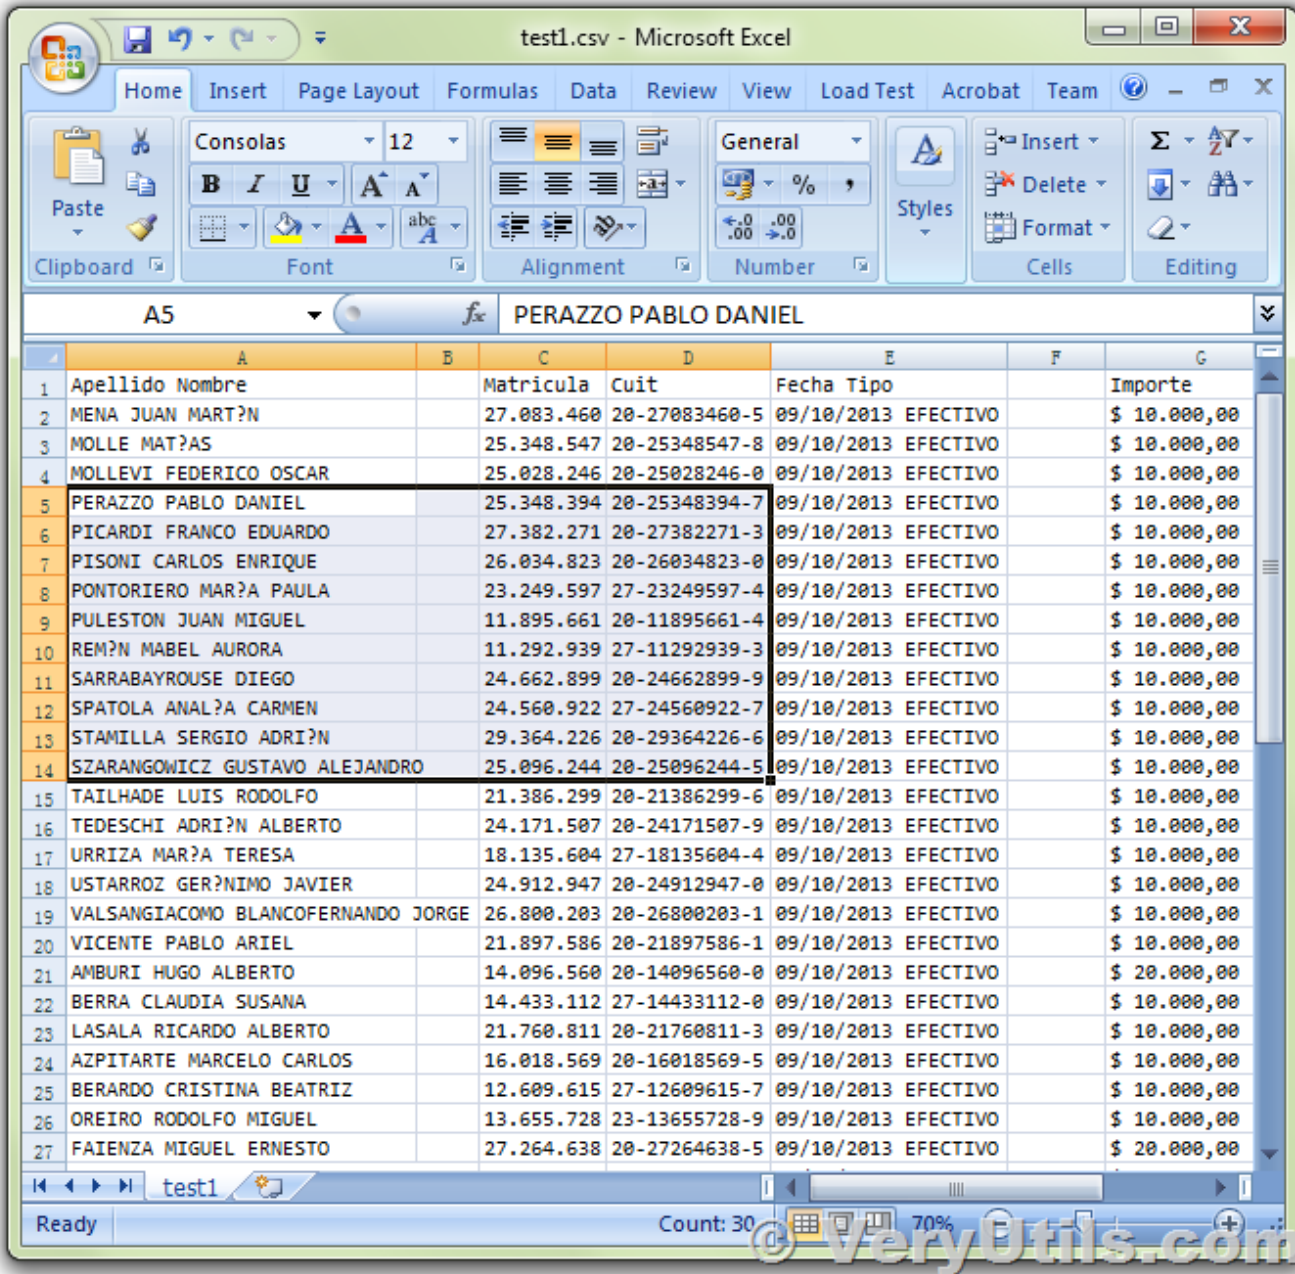

Apellido	Nombre	Matricula	Cuit	Fecha	Tipo	Importe

5. We will run following command line to convert this PDF file to CSV file,

```
pdf2excel.exe -$ XXXXXXXXXXXX -o test1.csv test1.pdf
```

6. Open the output CSV file in the MS Excel application, the text columns in MS Excel application look perfectly.
