

You may shoot a video to capture a particularly important moment but the lighting isn't exactly what it could be, thus result in a muddy, low-contrast video that is difficult to watch. To help you retain an important memory and avoid disappointing results, **VeryUtils** Video Editor software is a good helper to increase the brightness to your video. Just follow some simple steps below to easily increase the brightness of video.

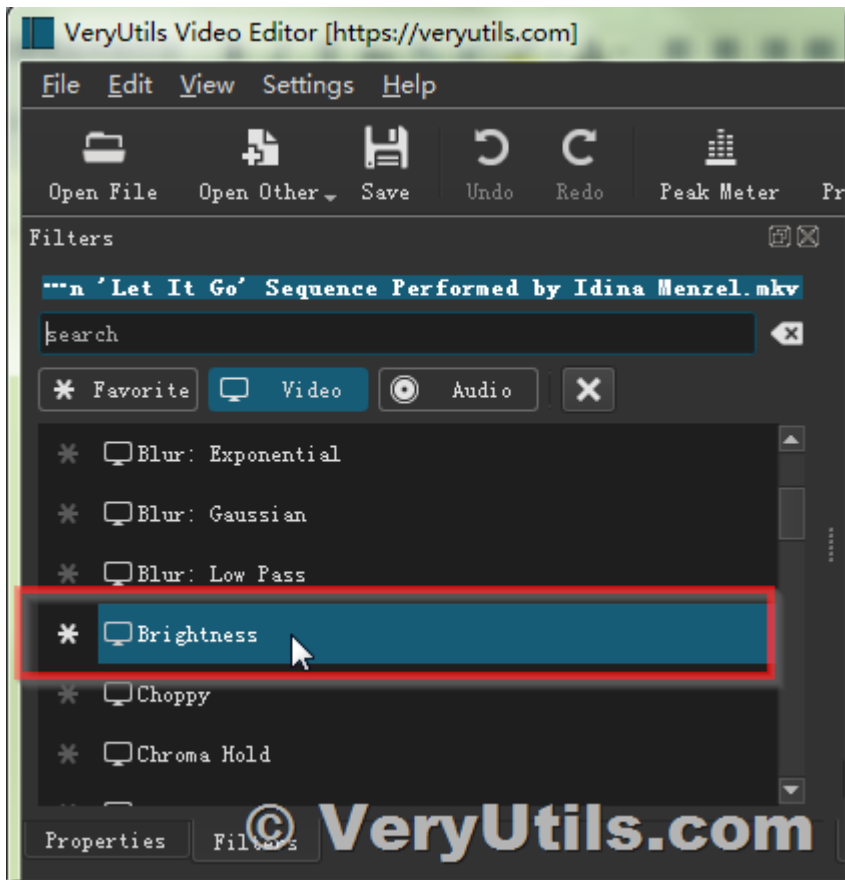

1. Please download and install **VeryUtils** Video Editor software from this web page,

<https://veryutils.com/video-editor-software>

2. Run VeryUtils Video Editor software and open a Video file,

3. Click "+" to add a Filter, choose "Brightness" attribute,

4. Set the "Level" for Brightness to 200%,

5. You will be able to see the difference of Brightness between the new video and old video, Old video with default brightness,

New video with 200% brightness,

6. The final video file with brightness looks better now,

VeryUtils Video Editor is a great software to increase brightness to your Video file, if you like this software, you may buy and download it from this web page directly,
