It happens to everybody: wrong camera angle while shooting a video. Neither smartphone users, nor action camera owners are immune to that. And if you're looking for a way to rotate a video right now, you probably know the feeling.

If you've ever recorded a video on your smartphone, only to find it sideways or upside down, then you know how frustrating it can be to watch it later. If you use Windows, you can rotate the video and save the video permanently in [VeryUtils](#) Video Editor software, this article will show you exactly how to rotate the video in [VeryUtils](#) Video Editor software.

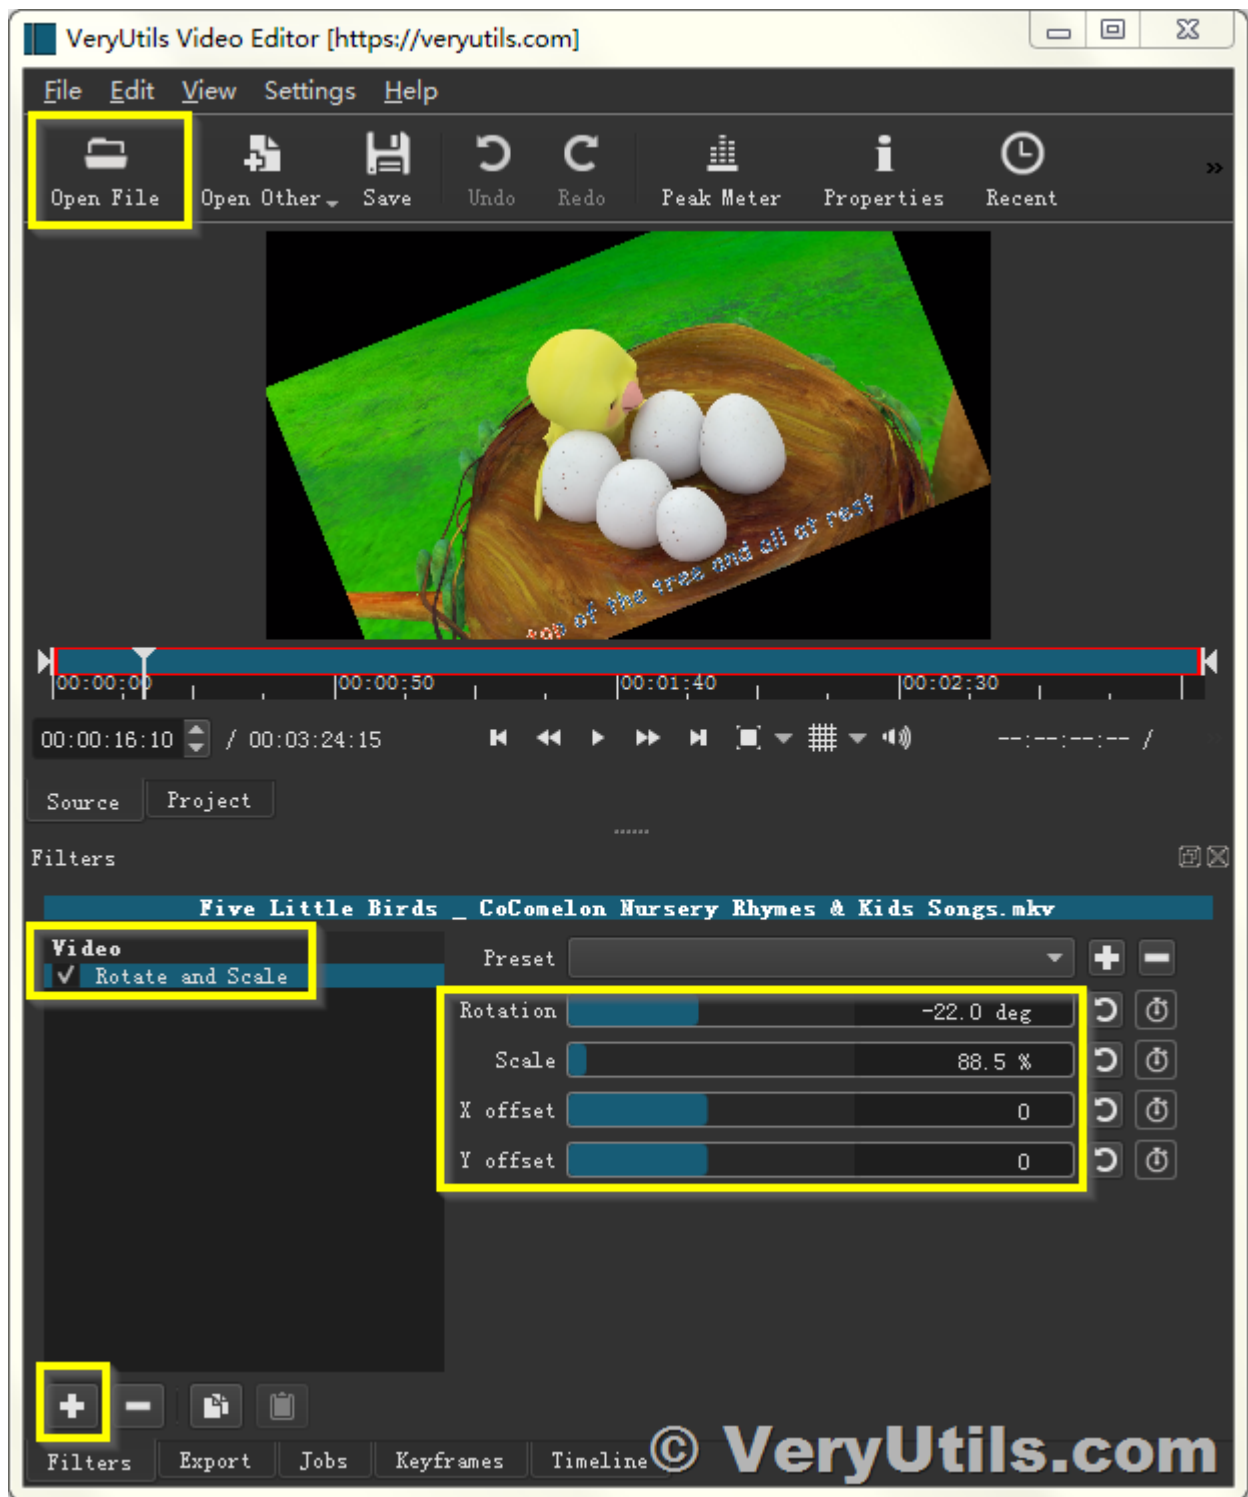

When people use smartphone cameras to record video, they often accidentally hold the device at the wrong angle, making the video recording upside down. In this case, it is necessary to flip or rotate the video afterwards so that it is displayed correctly to the audience. For videos recorded in landscape orientation, you can rotate the video 90 degrees, and for videos recorded upside down, you need to flip the video 180 degrees. Continue reading to learn how to rotate the video 90 or 180 degrees through our software.
