I'm looking for a Android PDF Reader SDK for Android mobile platform. I have an android app that I want to add PDF viewing and have users place their initials onto the PDF. I want to then save the PDF with their initials.

Customer

Thanks for your message, we have a PDF Viewer Source Code License for Android platform, you may download the trial version from this web page to try,

https://veryutils.com/pdf-reader-for-android-source-code

after you buy the PDF Viewer Source Code License for Android system, you can integrate its source code into your Android app and allow your app to view PDF files easily.

VeryUtils PDF Reader SDK for Android offers complete PDF reader with text search extraction capabilities. The java framework is relying on fast and stable native library optimized to work on ARM, x86 and MIPS architectures both 32bit and 64bit. Developers might extend features and customize behavior adopting the complete set of API from the native VeryUtils PDF

Reader SDK tool.

VeryUtils's team is day by day improving the framework and is introducing useful and simple to be adopted features.

Out of the box features are:
* open PDF from file system.
* open PDF from memory.
* open PDF from http stream.
* open encrypted PDF files.
* view PDF files in portrait, landscape, double page, vertical continuous, horizontal continuous.
* annotations flattening.
* text search single page, double pages, continuous vertical scroll, continuous horizontal scroll.
* many more.
