Email blast and Bulk Emails

Batch Email Sender with Multiple SMTP Support

© **VeryUtils.com**

Mass Email Sender is a robust desktop and Server software that is capable of sending out tens or hundreds of thousands of emails. The **bulk email sender** can send emails in three different ways:

- 1) Custom SMTP relays,
- 2) Direct DNS sending (example send emails from coffee shops or any other private or public IP)
- 3) May even send emails through proxies.

Mass Email Sender Desktop Software Core Features:

* 3 Ways of sending:

- 1) Custom SMTP relays;
- 2) Direct DNS sending from private/public IPs;
- 3) Send emails through proxies.

* Automatic email list cleaning – removes bounced emails from your email list.

* HTML editor for creating your email.

* IP reputation warmer feature: increase the total emails sent over time incrementally to warm up your IP sender reputation and benefit from a high inbox rate.

* Filters: do not send your email to more than one company email or emails longer than X characters.

* Short URLs: generate unique short URLs for your main link inside the email to avoid blacklists.

* Send test emails to yourself.

* Automatically switch between multiple SMTP servers, which avoids the limit of the sending frequency of a single SMTP server.

* Support Command Line operation.

* Support Windows, Mac and Linux systems.

* Full PHP source code available to you after purchase.
