

Create and secure your web content with a simple PHP user **login script!**

A simple and easy-to-use PHP **login script** that enables you to create password-protected areas on your website that can only be accessed through member accounts. You can use our PHP user login script on your website to create group user access to any content and downloadable files. With a purchased license, you can get the full PHP source code and make any custom modifications to the PHP login script, or you can ask us to do it for you.

Integrate a PHP membership login script into your website, which will deny or grant access to selected parts of your website. Only allow registered members to access your exclusive or internal content. The following are the highlight features included in the PHP member login script:

Create and protect content

Use PHP login scripts to create content, upload media and files on your web pages, and secure them with a simple login form.

Member profile

Manage user profiles from the admin panel and embed them in any web page.

User registration and login

Separate integration codes allow you to install login and registration forms on different pages of your membership site.

Email notification

Set up auto-reply messages that will be automatically sent to users and administrators, adding the subscriber's name to the message.

Grant user access

Create and manage unlimited members, you can add, delete and remove these users.

Secure PHP pages

Secure any page on your website with a simple login form.

Manage member profiles

Manage user profiles and memberships from the member login script management page. Embed the user profile in any web page and select the required fields for the member profile.

PHP source code customization

Purchase a Company License and make custom changes to the PHP login script. We can also provide custom development services, modifying the PHP code to better meet your needs.
