

Sign Any Document Online In Seconds

No need for a printer, Photoshop, or your company director. Try for free,

<https://veryutils.com/verypdf-pdf-signer-cloud-service>

The screenshot shows the VeryPDF PDF Signer Cloud Service interface. At the top, there is a navigation bar with icons for Signature, R/Stamp, Text, Draw, Image, Symbols, Shapes, Fields, Input, and Rotate. Below this is a toolbar with options for Align Left, Align Center, Align Right, Bold, Italic, Underline, Strikethrough, Font, Stroke Size, Color, Duplicate, and Delete. The main content area displays a document titled "VeryPDF PDF Signer Cloud Service" with the URL <https://veryutils.com/verypdf-pdf-signer-cloud-service>. The document is a Form W-8BEN, "Certificate of Foreign Status of Beneficial Owner for United States Tax Withholding and Reporting (Individuals)". A red dashed box highlights a "VeryPDF Virtual Printer SDK" icon. A large "ACCEPTED" stamp is overlaid on the document. The form includes sections for "Do NOT use this form if:" and "Part I Identification of Beneficial Owner (see instructions)". The form is partially filled out with the name "Frank Don" and the date "September 28, 2022". A "VeryUtils.com" watermark is visible at the bottom right of the document.

Upload Document

Upload any PDF or Word or Excel document, whether a photo, a scan, or a PDF file!

Upload Your Signature

Even a photo from your phone will do. The service will remove the background but keep the image quality and color.

VeryUtils PDF Signer Cloud Service is a webservice which helps you to sign a contract, act, invoice or any other document in electronic format. No torment in graphic editors.

What do you need?

1. The document, its scan or photo.
2. Scan or photo of the signature.
3. Scan or photo of the seal or stamp.

Signature and stamp can be scanned as one file.

Supported formats

You can upload the file in the format you have it:

- as a picture — .jpg, .jpeg, .png.
- as a document — .pdf, .doc, .xls, .ppt, .docx, .xlsx, .pptx.

You can upload the signature and stamp in .jpg, .jpeg, .png formats.

Is it possible to upload multiple-page documents?

Sure, but only if you pay for a single document or unlimited tariff. When you upload multiple-page .doc, .xls or .pdf document, all the pages will be uploaded automatically.

How are the signatures processed?

The background is automatically removed from the signatures, you just choose the quality. By the way, if you change the signature size on the document, the service will remember the new size and will use it while re-adding.

How long documents are kept in the web service?

Signed documents are kept 24 hours from the moment of uploading, then completely removed.

Signatures and stamps are kept until you delete them.

So you do not waste time reloading frequently used seals and signatures.

Is it legal?

In order to eliminate possible contradictions when signing contracts, we also recommend that

the text of the contract should include a condition on the use of a facsimile (including electronic graphic signature) to sign this contract, its appendices and annexes, and that a condition on the method of exchange of legally significant messages via e-mail and the e-mail of each party should be added to the contract.
