Your PDFs contain actual content, not just text or images. **VeryUtils** PDF Comparer intelligently compares the content in your files. Any differences are shown in a visually gorgeous display, akin to holding up two pieces of paper to the light.

Comparing is as simple as dragging two PDFs into the compare window and clicking on the compare button. The result is a simple, intuitive overview of any differences detected in the two documents.

Instead of only comparing text in the PDFs, or converting the PDFs to images and comparing those pixel by pixel like other comparison tools, VeryUtils PDF Content Comparer can intelligently compare the actual content elements in your files.

The ability to compare multiple files against one another is something that you may need to do at some point in education or work. Observing the difference between two different PDF or Word files is not difficult, all you need is a tool that will compare files and show you the similarities. VeryUtils has designed an inventive solution for comparing texts. With the VeryUtils PDF Compare Tool, you can see the similarities between two PDFs within seconds. You can compare two PDF documents side by side, and similar text is highlighted in both the documents.
