Another advantage of **VeryUtils** PHP Easy Lock is its security. The script uses a strong encryption algorithm to ensure that your password is secure and cannot be easily guessed or hacked. This means that you can have confidence that your protected pages will remain secure even if someone tries to access them without the correct password.

In addition to its ease of use and security, **VeryUtils** PHP Easy Lock also offers a number of other useful features. For example, you can customize the appearance of the password prompt, including the background color and text color. You can also set an expiration date for the password, so that it will no longer work after a certain point in time. This can be useful if you want to provide temporary access to a page for a specific group of users.

Overall, VeryUtils PHP Easy Lock is a great choice for anyone who needs to protect their web pages with a password. Whether you're a web developer looking to add an extra layer of security to your site, or a business owner who wants to restrict access to certain pages, this script is a simple and effective solution. So, it is a very useful tool for web developers and business owners.

VeryUtils PHP Easy Lock Highlight Features:

- \* No installation, no configuration, no database needed.
- \* Everything is inside a single file.
- \* Very easy to use. For basic usage you only need 1 line of code.
- \* Fully Responsive and brand new design. Works perfect on mobiles, tablets, laptops and desktops.
- \* For higher functional demands, there are lots of options, like sha512 encryption, IP blocking, limiting number of attempts etc.
- \* Running very fast ~0.006 seconds (6 milliseconds).
- \* Remember me option - will set an encoded cookie to keep the user logged in.

Simple examples of usage:

```
<?php
    include("password_protect.php");
?>
```
