

I want display a PDF as an html page, where the user will be allowed to enter the fillable data. My problem is not how to import/fill data (I was able to do it using FDF/XML data format). My only concern is how to show it to the user so that he/she can see the form, fill/edit data, and should be done with it.

I tried saving the PDF as an image file, and showing it as an background-image - but it was very crude! - I am hoping that there should be some elegant solution.

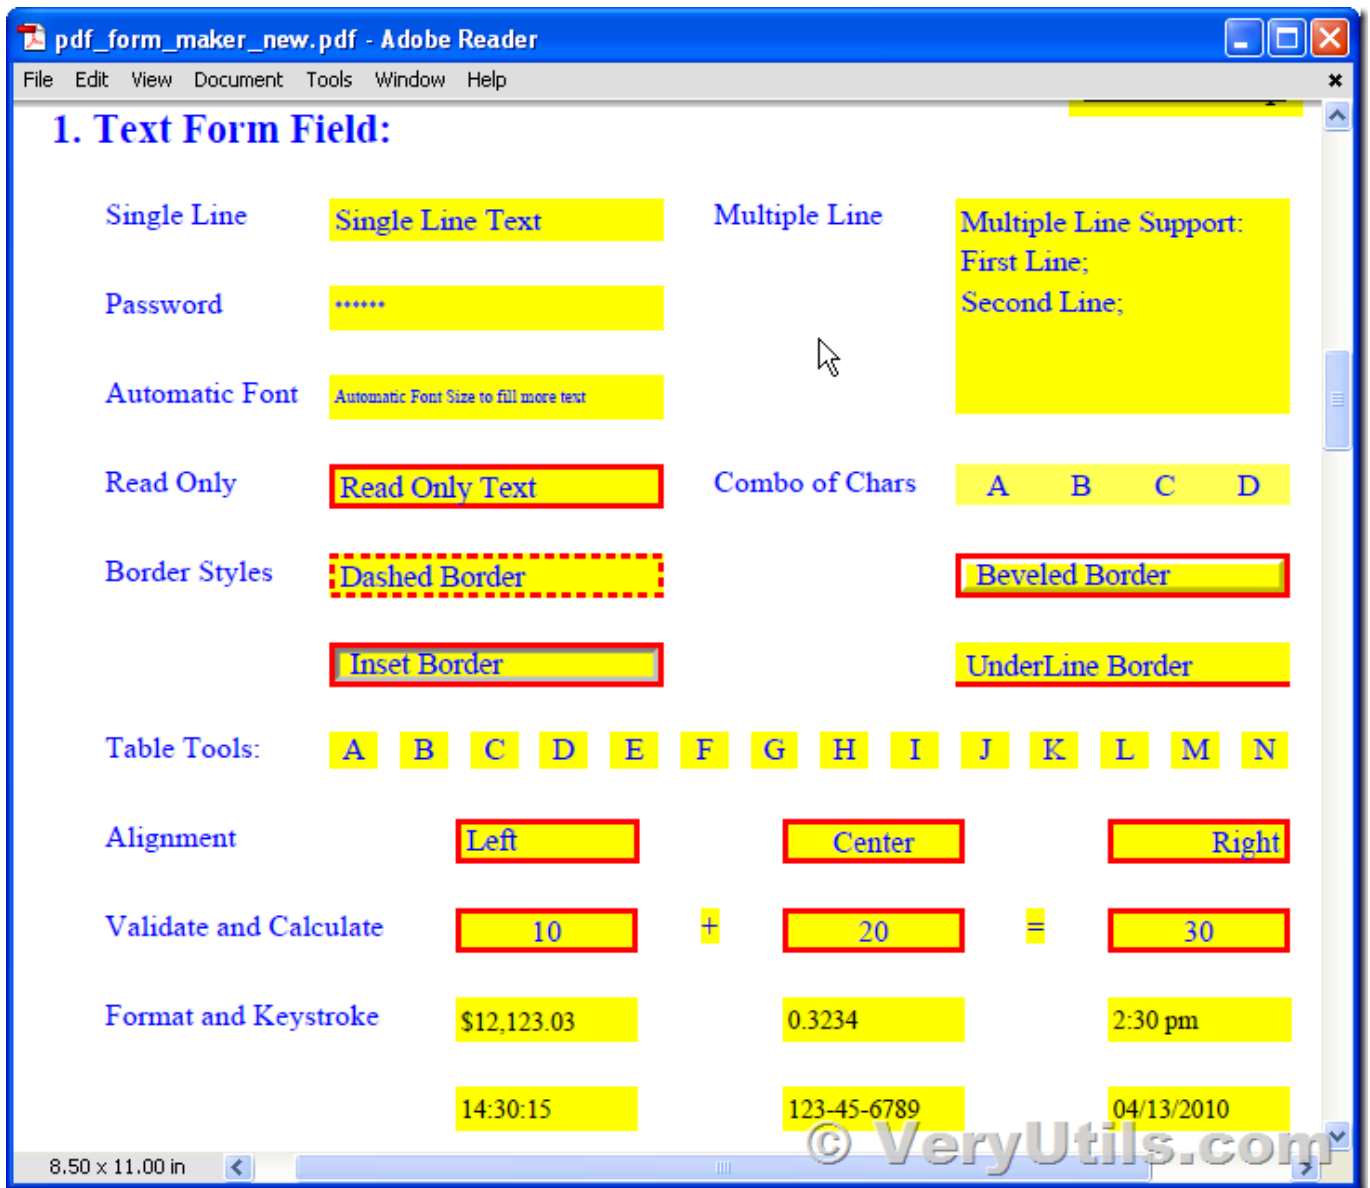

Thanks for you help!

Customer

Above question was sent from a customer, he want to fill the fillable PDF forms in web page directly and without require Adobe Reader installed in the user's system. Fortunately, **VeryUtils** PDF Form to HTML5 Form Converter is a product which can 100% meet this customer's requirement. **VeryUtils** PDF Form to HTML5 Web Form Converter can be tested from this web page,

<https://veryutils.com/pdf-to-html5-form-filler-for-php>
