Streamlining Email Conversion Processes

The VeryUtils EML to PDF Converter is designed to simplify the conversion of EML (Email Message Format) files into the widely compatible PDF (Portable Document Format) format.

Whether you're an individual user looking to archive important emails or a business professional needing to convert bulk email files for documentation or legal purposes, this software provides a user-friendly and efficient solution.

Addressing Common User Queries

During its implementation, the VeryUtils team has been proactive in addressing common user queries and concerns to ensure a smooth user experience. Let's take a look at some typical questions users might encounter and how the VeryUtils team provides solutions:

Hi,

Program does not launch correctly – error message "Failed to locate "C:\Program Files (x86)\VeryUtils EML to PDF Converter v2.0\lib\wget.exe" file",

This same error message occurs on any machine tested. This file does not exist after installation.

Customer

Sorry, please download the latest version of "VeryUtils EML to PDF Converter" software from following web page, the latest version of "VeryUtils EML to PDF Converter" software includes wget.exe application.

VeryUtils

Thanks, however I am running into a new error now. The "VeryUtilsJava.zip" is not being recognized as a .zip archive after downloading:

Customer

Sorry, this problem should not happen, VeryUtilsJava.zip is just for Java applications.

Did you run "C:\Program Files (x86)\VeryUtils EML to PDF Converter v2.0\lib\eml2pdf-cli.exe" command line in CMD window? Can you send me the full command line that you are using?

Btw, did you change something in the config.ini file?

VeryUtils

Hello,

btw, I have found the reason of the problem.

It seems your system hasn't Java installed, "VeryUtils EML to PDF Converter v2.0" is depend on Java "1.8.0_202", here is java version in my system,

C:\Users\admin>java -version

java version "1.8.0_202"
Java(TM) SE Runtime Environment (build 1.8.0_202-b08)
Java HotSpot(TM) 64-Bit Server VM (build 25.202-b08, mixed mode)

Because your system hasn't Java installed, so eml2pdf-cli.exe will try to download and install Java automatically.

If eml2pdf-cli.exe can't download and install Java correctly, you need to install Java by manual.

You may download and install Java jdk-8u202-windows-x64.exe from following web page, then you will be able to get "VeryUtils EML to PDF Converter v2.0" work fine,

https://www.oracle.com/java/technologies/javase/javase8-archive-downloads.html

VeryUtils

This worked, thanks so much!
