- Compare Documents
Quickly and reliably identify differences between two versions of a document across different formats. Identify unauthorized changes quickly, check to see if edits were implemented as agreed, or verify that the document has not been changed at all.

- Compare Documents Quickly, Reliably, and Effortlessly
Avoid the long, tiresome process of comparing text in two documents line by line. VeryUtils PDF Comparer detects the differences between two versions of a document within seconds. It accurately identifies relevant changes to the text without additional conversion steps, even if the versions of the document are in different formats such as Microsoft Office, digital PDF, scanned PDF, or even other scan and image files.

- Focus on the Most Important Differences
VeryUtils PDF Comparer will only display the differences that affect the meaning of the document and disregard insignificant differences such as formatting or line breaks. This lets you review documents 5 to 20 times faster, so you can focus on what is most important, simplify your work, and reduce the chances of missing something that matters. You can even manually disregard differences that are not relevant for your task, and they will no longer appear in the list of comparison results.
