

Let us host your scripts! No need to install anything. We will host our scripts for you in the cloud!

This is the perfect solution for anyone who wants to use our scripts but doesn't want or can't install them on their own hosting account. Leave the technical work to us and benefit from our "Remotely Hosted Scripts Service". You can integrate the scripts you need into your website and get it ready to use quickly.

With our "Remotely Hosted Scripts Service", you will benefit from our dedicated support, free and additional services. You don't need any IT skills to start using our web software that will improve your website and online business.

© **VeryUtils.com**

We believe that a product is not just a product. Especially when it comes to software and web development. All our PHP scripts come with additional benefits and support services. Every web project is unique. That's why we strive to provide flexible solutions to meet the needs of each of our clients.

Advantages of remotely hosted Scripts services:

* Simple and fast

You don't need a hosting account to use our scripts. We will host it for you!

* Free website integration

Our support team will integrate the script front end on your website.

* Reliable and secure hosting

Hosted on fast and reliable servers monitored 24/7 by our team.

* Daily backup

All remote accounts are backed up daily to an offsite backup server.

* Regularly updated

We continuously improve our products based on the feedback we receive.

* Dedicated support

Our support team is here to help you and answer any questions you may have.

* Custom modification

Contact us and request customizations you may need.

* No commitment

No obligation to. There are no setup or transaction fees. Cancel anytime.

Remote Hosted Scripts Service FAQ:

A: What are the requirements?

Q: There are no special requirements as the script will be hosted on our servers.

A: How long does it take to set up the script?

Q: It takes 24 to 48 hours for the script to be set up for you.

A: How do I access the admin panel of my script?

Q: You will receive an email with your access details (user, password) and a link to your personal administration page, and you will be good to go.

A: How do I embed scripts into my website?

Q: Integrating scripts is a very simple process - just copy/paste a few lines of code into the

page you want the front end to appear on. Or you can contact us and we will integrate it for free.

A: Can I access the admin panel from anywhere?

Q: Yes, no matter where you are, all you need is a PC with an active Internet connection.

A: I need to change something. Can you help me with this?

Q: Yes. You can request any type of custom modification. Just contact us and describe your needs.

A: Will you upgrade my scripts when new versions are available?

Q: Yes, we will keep your script up to date and enhance it with all future features we add. It will be free. You don't need to take any action. Don't worry - the upgrade won't affect your data.

A: How secure is my data?

Q: Your script's admin panel can only be accessed with valid login details. Only people authorized by you can access it. Since your scripts will be hosted by us, we will regularly back up your information and keep it safe from illegal actions by third parties.

A: What does the annual fee include?

Q: An annual subscription includes hosting, maintenance, technical support, and any future updates and upgrades.

A: Do I have to sign a contract?

Q: You can unsubscribe at any time and we can send you the script and all the data so you can host it on your own hosting account.
