Download VeryUtils Video Watermark software to easily add watermarks to video files on Windows system. Video Watermark software can be used to Batch Convert Videos and Fast HD Video Conversion.
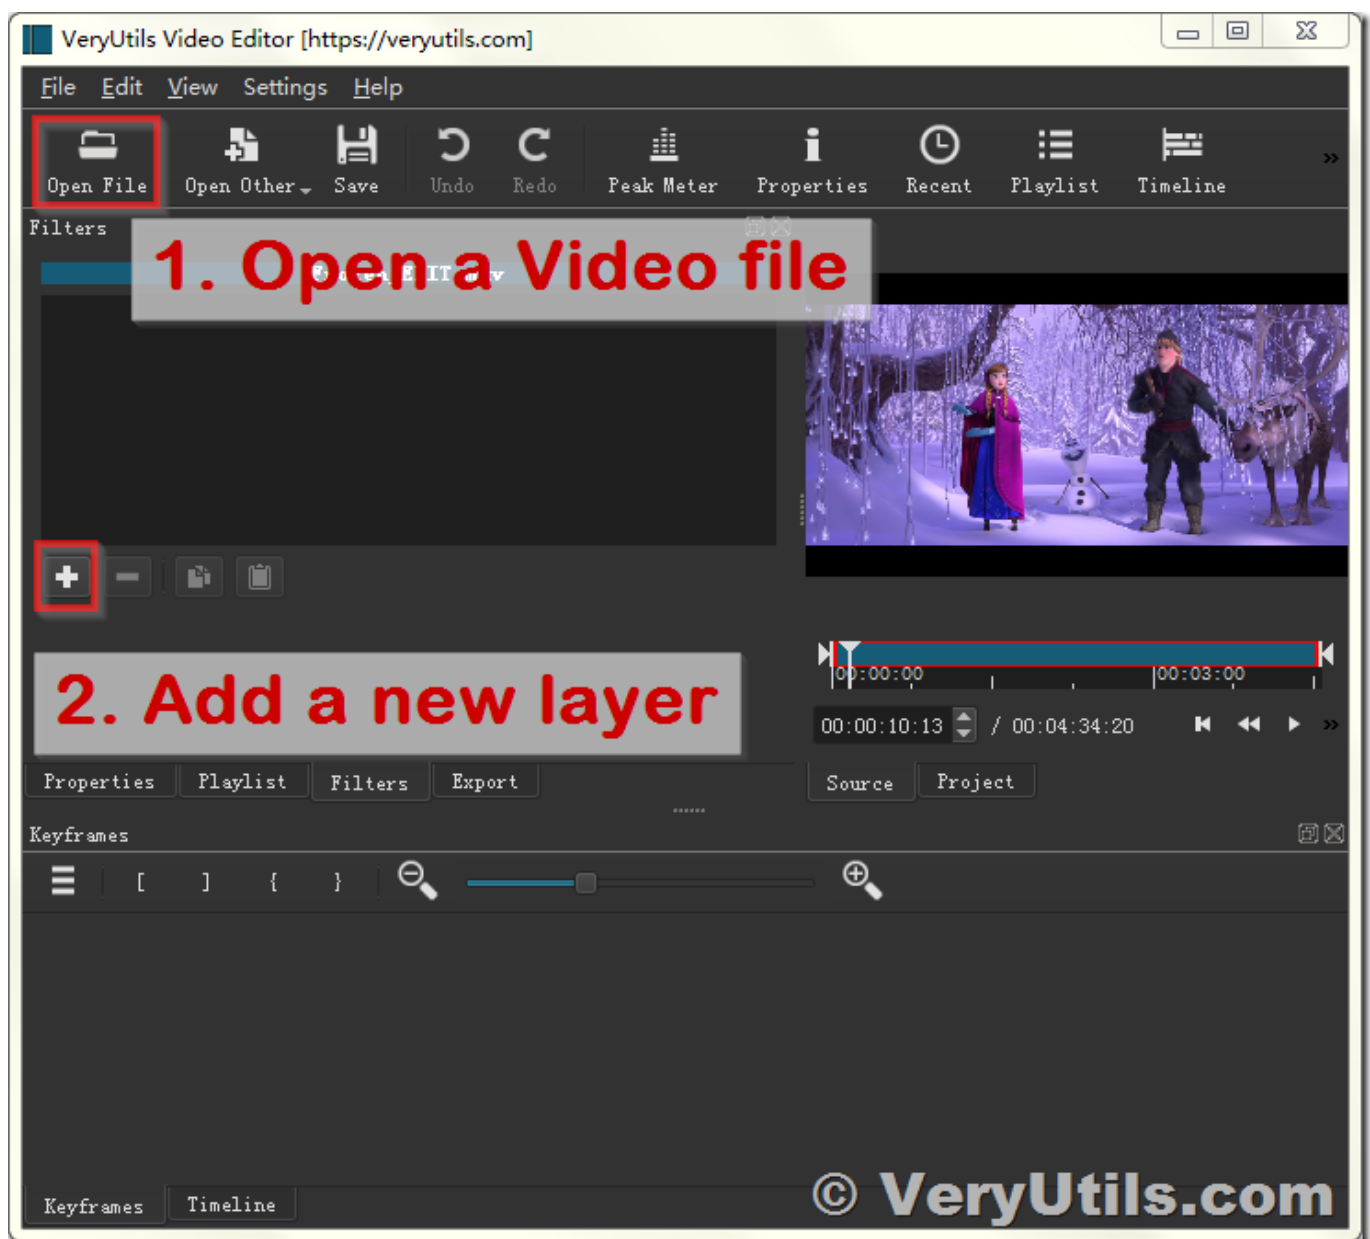

One of the biggest requirements of video producers is to protect their works from being copied online. Everyone has the right to protect their property so that they cannot use it for any other applications without permission. Watermark technology is one of the best solutions to meet all your online video protection needs, because it can help producers keep in touch with digital trends, improve the ratings of their videos, and better control unnecessary content redistribution.

VeryUtils Video Watermark Software is the easiest way to add watermark to video.
As more and more content gets reposted and re-shared, it's important to watermark videos so that viewers know the original creator of the content they are viewing. Using VeryUtils Video Watermark Software, you can add a permanent watermark in your desired location of your content. Video Watermark Software works completely offline, so you needn't upload your video files to any third party servers during watermarking.
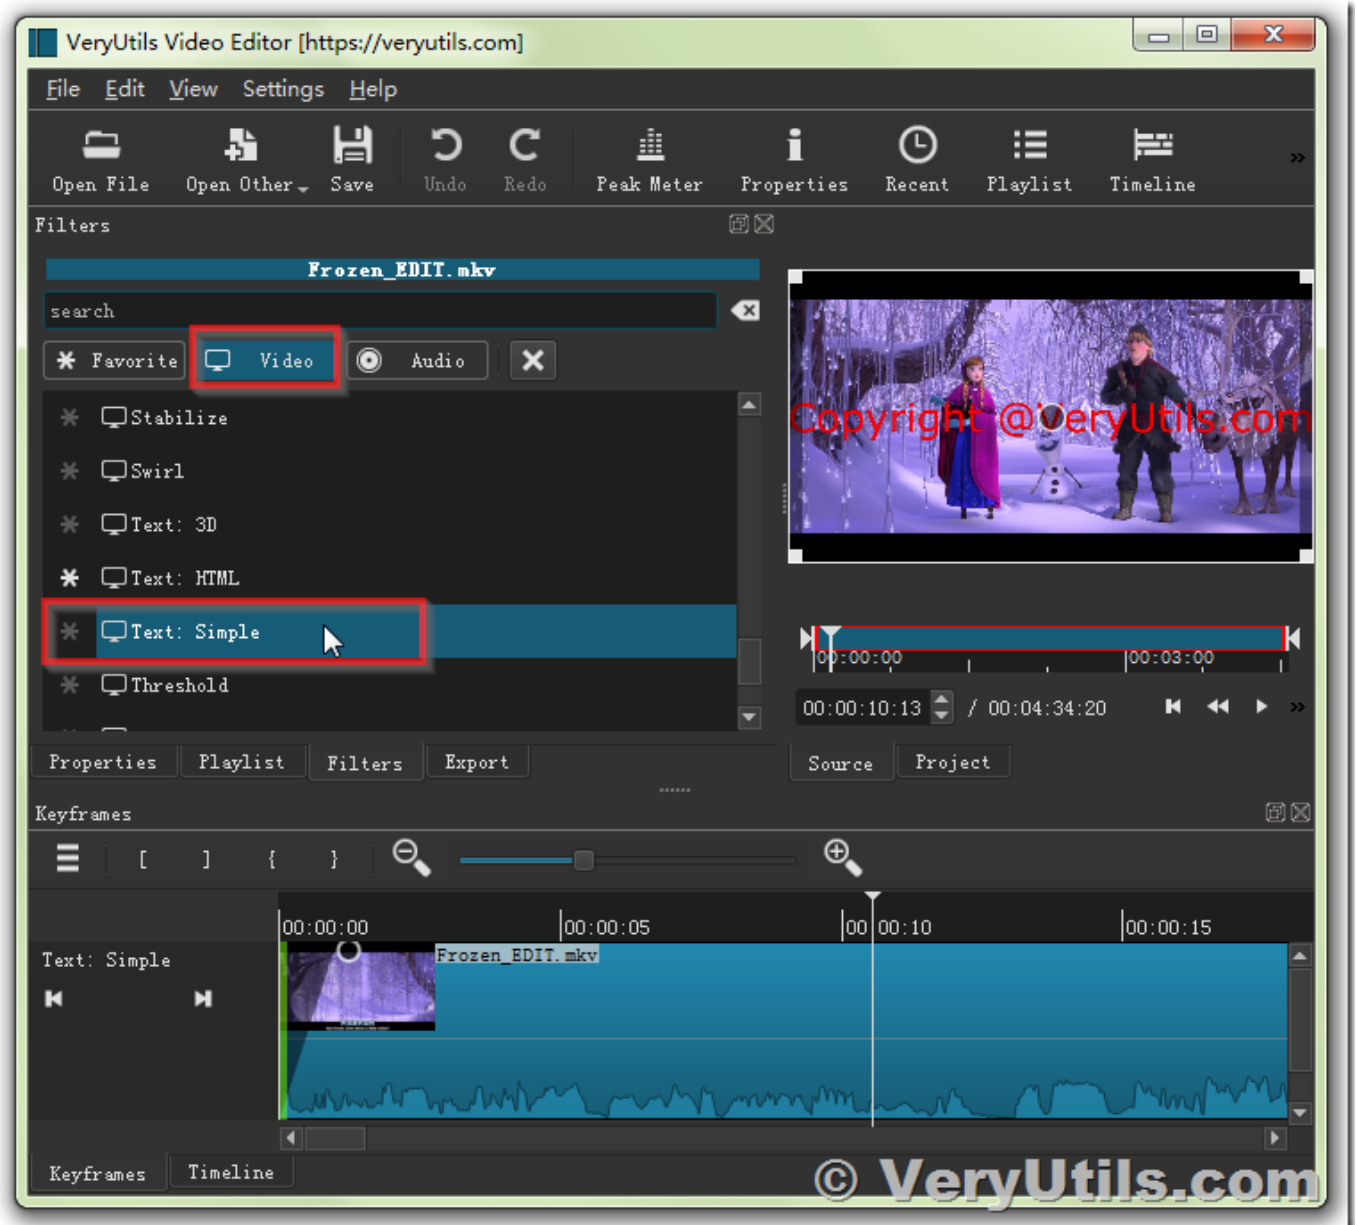

This tool will help you protect your content and brand by making it really easy to place a watermark of your choice on your content. It works for both videos and photos in a straightforward drag-and-drop editor. We hope you enjoy the VeryUtils Video Watermark Software for adding watermarks to video!

Please by following steps to study how to add watermark to a Video file,

1. Please download and install VeryUtils Video Watermark Software from this web page,

https://veryutils.com/video-editor-software

2. After you install the software, please run it and open a Video file,

3. Click "Open File" button to load a Video file first, and click "+" button to add a new layer,

4. Add a "Text: Simple" layer under the Video type,

5. Enter watermark text contents and set the other options,

6. You can set the alpha or opacity to text watermark also,

The watermark with solid text color is become opacity text color now,

7. You can also add a 3D Text watermark to the Video,
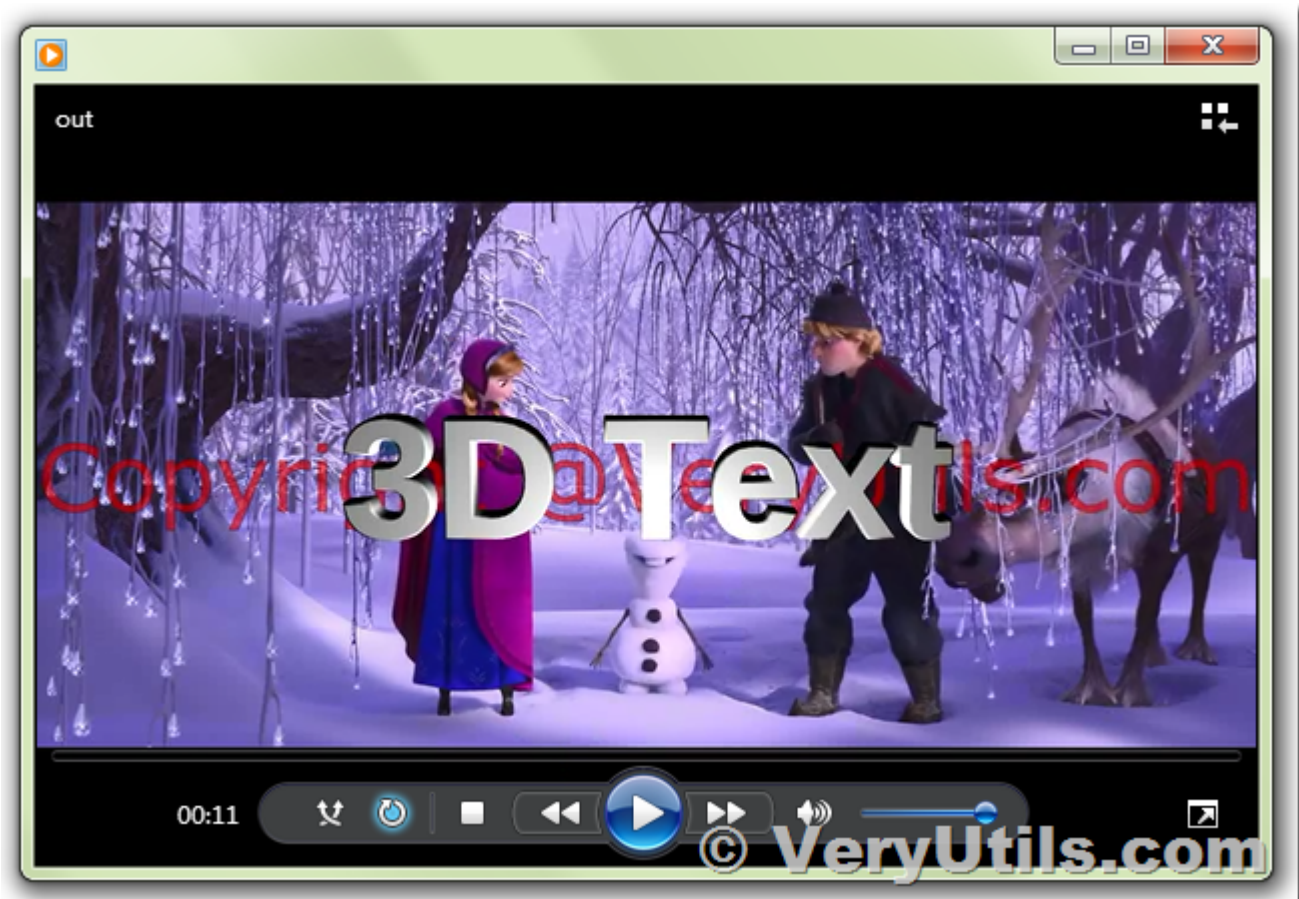

The screenshot of Video with 3D text watermark,

8. You can click "File"->"Export Video" menu items to export current video with text watermark to a new Video file,

9. In the Export window, you can choose more output Video formats, we will choose "WMV" format for example,

10. After we get the final Video file, we can play it in the Video player, the final Video file contains our copyright Text Watermark properly.

11. Now, we can upload this Video file to YouTube or share it to others, the watermark in video will help us to protect our copyright completely.
