

VeryUtils Virtual PDF Printer is a software application that allows you to create PDF documents from any printable file or document. It works like a **virtual printer**, meaning that when you print a file or document using **VeryUtils** Virtual PDF Printer, the software creates a PDF document instead of printing it on a physical printer. This can be useful if you want to save a copy of your documents in PDF format, share them with others, or simply keep a digital backup of your important documents.
