Disk recovery software and hard drive recovery tools
With the help of new and unique data recovery technology, Windows data recovery software is the most comprehensive data recovery solution for recovering files from NTFS, NTFS5, ReFS, FAT12/16/32, exFAT, HFS/HFS+ and other partitions. It also uses raw file recovery for

severely damaged or unknown file systems (scanning for known file types). Even if these partitions are formatted, damaged or deleted, it can also run on local and network disks. Flexible parameter settings give you complete control over data recovery.

What can you recover?
Did the computer crash? Important files deleted? We restored them all!

Supported documents
* DocumentDOC/DOCX, XLS/XLSX, PPT/PPTX, PDF, CWK, HTML/HTM, INDD, EPS, etc.
* PhotoJPG, TIFF/TIF, PNG, BMP, GIF, PSD, CRW, CR2, NEF, ORF, RAF, SR2, MRW, DCR, WMF, DNG, ERF, RAW, etc.
* VideoAVI, MOV, MP4, M4V, 3GP, 3G2, WMV, ASF, FLV, SWF, MPG, RM/RMVB, etc.
* AudioAIF/AIFF, M4A, MP3, WAV, WMA, MID/MIDI, OGG, AAC, etc.
* Mail and email PST, DBX, EMLX, etc.
* ArchiveZIP, RAR, SIT, etc.

Supported devices
* Recycle Bin: PC/Mac/laptop/portable...
* Memory card: SD, SDHC, microSD, miniSD, CF, SmartMedia, MMC, XD...
* Hard Disk: Dell, IBM, HP, Toshiba, Sony...
* Removable drives Seagate, WD, Apple, Samsung, Toshiba...
* Flash drive USB drive, jump drive, pen drive, thumb drive...
* Digital cameras/camcorders: Canon, Kodak, Nikon, Sony, JVC...

More features:
The Windows Data Recovery software utility can recover files:
* Deleted, no recycle bin, or empty recycle bin;
* Eliminate through virus attack or power failure;
* After reformatting the partition with files, even for different file systems;
* Recover data in the following situations: VIRUS has invaded; FAT has been damaged; MBR has been destroyed; FDISK or other disk utilities have been running;
* When changing or damaging the partition structure on the hard disk;

* Recover data on damaged or deleted partitions;
* From a hard disk with bad sectors;

Support for:
* Basic (MBR), GPT, BSD (UNIX), APM (Apple Partition Map) partition layout scheme;
* Dynamic volume, Windows storage space (Windows 2000-2019/8.1/10);
* Apple software RAID, CoreStorage, File Vault and Fusion Drive;

Windows Data Recovery software can automatically identify and assemble the components of these disk managers, even if their databases are slightly damaged. You can manually add components with severely damaged databases.

Advanced data recovery algorithm:
* Improve the quality of file recovery when the file system is not damaged;
* Recover files that are not recognized in the file system metadata and cannot be found during disk scanning;
* Recover files from devices whose file system is unknown, including HD, CD, DVD, floppy disk, CF card, USB drive, ZIP drive, Memory Stick and other removable media.

Support specific file system functions:
* Identify the local name;
* NTFS encrypted files, NTFS alternate data stream, NTFS deduplication, NTFS LogFile, NTFS symbolic links and directory connections;
* HFS + diary processing, HFS + extended attributes, HFS + compressed files;
* Ext2 / Ext3 / Ext4 FS / UFS diary processing and extended attributes;
*Recover deleted to recycle bin and waste paper. The name and path of the file.

In-depth file analysis:
* Extended file search and shielding functions;
* Estimate the chance of recovering files successfully;
* Detailed file information. The file information in the technician version is more extensive: specific file system information, overlapping files, disk areas, etc.;

\* File recovery list for batch file recovery. File recovery list, which contains a large number of file information in the technician version.
