

I have a customer that has a computer system that prints text reports to a specified IP address of a printer, although there will not really be a physical printer there. Instead, the IP address will be some type of software that captures the text report. It should then be able to turn it into a PDF file and either mail it or post it somewhere so that their other customer can access it. Do any of your software packages do that?

Customer

**Capture Print Jobs, Convert them to PDF
files, Save them to Cloud Database**

© **VeryUtils.com**

Thanks for your

message, yes, we have this type of software, we can make a software to work for you by

following steps,

1. We will create a Virtual Printer software for you, you will install our Virtual Printer on a physical computer, we can suppose this computer is a Printer Server, our Virtual Printer will monitor the IP address of this Printer Server, e.g., \\192.168.1.10,
2. You can print documents to IP address of \\192.168.1.10 from client systems,
3. Our Virtual Printer will accept printed jobs from client systems, convert **print jobs** to PDF files, save these PDF files and other information to a database.
4. Finish the jobs.

We already have some products can be used for test purpose, you may download these products from following web pages to try,

== PDF Virtual Printer SDK Based on Postscript Printer Driver for Developer Royalty Free,

<https://veryutils.com/pdf-virtual-printer>

This is a Virtual PDF Printer, you can print any documents to this Virtual PDF Printer, save to PDF files and upload PDF files to a web server.

== Virtual Printer SDK Based on PCL Printer Driver for Developer Royalty Free,

<https://veryutils.com/pcl-virtual-printer>

You can use this Virtual PCL Printer to save **print jobs** to PCL files.

== EMF/PDF/Image Virtual Printer Driver SDK for Developer Royalty Free,

<https://veryutils.com/emf-pdf-image-virtual-printer-driver-sdk>

You can use this Virtual EMF Printer to save **print jobs** to EMF, PDF and Image files.

== **VeryPDF** HookPrinter Print Logger,

<https://veryutils.com/hookprinter-print-logger>

You can use this HookPrinter to capture print jobs from all installed printers, convert these captured print jobs to PDF files, send the PDF files to a web server.

== docuPrinter GUI, Command Line and SDK,

<https://veryutils.com/docuprinter-sdk>

The docPrint Pro software contains a Virtual PDF Printer, Virtual EMF Printer and a Print Preview application.

== HookPrinter SDK for Windows Developers,

<https://veryutils.com/hookprinter-sdk>

This is a HookPrinter SDK for Windows Developers, if you are a developer, you can use this product to capture print jobs from all Windows Printers, convert them to Text, PDF, Image, etc. files, and send these files to a web server automatically.

You may download one or more of these software from our web site to try, if you encounter any problem with these software, please feel free to let us know, we are glad to assist you asap.
