## How to change the PDF paper size from Command Line? I would like to change from Letter paper size to A4 paper size, how do I do that?

Posted on 2019/07/09 by VeryPDF

✕ CLOSE

VeryPDF has a **pdfresizer.exe** Command Line application, you can run this PDF Resizer Command Line application from command line to change the paper size to PDF files easily, for example, you can run following command line to convert any paper size in PDF file to Letter paper size,

**pdfresizer.exe -resizepaper "612x792" D:\downloads\test.pdf D:\downloads\out.pdf**

If you need this **pdfresizer.exe** Command Line application, please feel free to contact us, we will assist you asap,

<http://support.verypdf.com/open.php>

### Question:

This command line is working very well to change the paper size in my PDF files. Is there any documentation you can pass along that would list the batch options that are available? I am particularly interested in the **-resizepaper** switch.

-resizepaper "**612x792**" converts PDF paper size to letter size.

Where does the 612x792 come from?

### Answer:

612x792 are points for the letter paper size, you can choose more paper sizes like below,
